

Guess how many Breakthrough T1D Rufus bears are in the jar?

We have filled this jar with Rufus bears. Try and guess how many are in the jar. Be warned they like to try and hide behind one another.

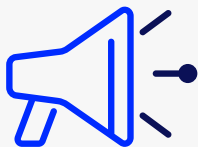

Driving breakthroughs for a world without T1D.

How it works

This game can be used at a school fair, family-get-together, or even at work. Those participating are pitting their keen eyes against these sneaky Rufus bears, who like to hide almost one behind the other!

- Step 1:** Print out the teddy jar page and as many guess pages as you need.
- Step 2:** Decide if people are playing just for the satisfaction of guessing correctly, or if you are going to add a prize to the mix.
- Step 3:** Decide how much you are going to charge for each guess. We suggest a minimum donation of £2.
- Step 4:** Once everyone has made their guess you can reveal the true number of teddies (see below for the answer), the person who guessed the exact or closest number, wins!
- Step 5:** See our paying in page for all the ways you can send us your fundraising total.

TIPS:

Make it harder by setting a time limit on how long guessers have to look.

You could ask a local business if they would donate a prize. If you have a prize, you must make sure each person guesses a different number.

Remove this strip and keep it secret!

Make sure no one gets to see the answer before the end.

Driving breakthroughs for a world without T1D.
